**Subject:** Before/After catch basins

I sent most or all of you several captioned photos late Sunday evening, including the one below of the lower catch basins in operation just above Cement Creek. Also below, I have added a "Before" photo showing the basin nearing completion Saturday. So you have a Saturday/Sunday comparison. Note that the flow of spill materials directly into the Cement Creek Saturday has been stopped in the Sunday photo. Dan Bender

Portal general location behind, above tree line?

3 culverts  
under road

Cement Creek just out of sight
